# Technology at work for you

## CONNECTING WATER PRODUCTION FACILITIES TO YOU

*The Third Operator Initiative*® is the bridge between data gathering and pre-emptive problem solving. Utilizing existing off-the-shelf technology, water systems can be monitored 24 hours a day, seven days a week. *The Third Operator Initiative*® provides the first line of defense in predictive to catastrophic equipment or distribution failure, accessible anywhere throughout the world with a valid internet connection.

Security concerns on when and who are entering a paramount to ensuring safe and reliable water to the Members. *The Third Operator Initiative*® is always watching 24 hours a day, seven days a week.

Basic recordkeeping is a snap with *The Third Operator Initiative*® through minute-by-minute tracking of the basic information with access from any computer or smart device, 365-days a year.

Quick review of the data is simple through the easy to navigate Dashboard allowing the operator and engineer quick insights into the operations.

## 24/7 Monitoring and Reporting

- UNLIMITED ACCESS TO DATA
- ACCESS DATA FROM ANY LOCATION
- PREDICTIVE ANALYSIS
- EARLY FAILURE DETECTION
- 24/7 SECURITY
- UNLIMITED DATA STORAGE
- SCALABLE
- AFFORDABLE
- DEPENDABLE
